- Specifications**
- Uses Fortec™ advanced rodent control technology.
  - Designed to encourage the natural feeding behaviour of the rodents through; touch and feel, smell, taste and also sight.
  - Encourages rats and mice to consume an increased amount of bait, and also to consume this amount quicker.
  - Even when other foods are available the Fortec™ technology means that the bait is more arresting than the other food sources.

<b>Benefits</b>	<ul style="list-style-type: none"> <li>- Controlling rodent populations quicker and more reliably than normal cut wheat difenacoum baits.</li> <li>- Fortec™ is a patented technology, which significantly improves the rodenticide consumption by making the bait more appealing and arresting.</li> <li>- Increasing the speed at which a lethal dose is consumed. Over 60% consuming a lethal dose of difenacoum on the first day of the bait being available. Then 100% consuming a lethal dose after the second day.</li> <li>- Reducing the contamination and consumption of other food sources and also reducing the damage to property. Compared to a normal cut wheat difenacoum based rodenticide.</li> </ul>
<b>Application</b>	<ul style="list-style-type: none"> <li>- Professional use only.</li> <li>- Agricultural and industrial sites.</li> <li>- Can be used for indoor and outdoor locations, (as long as protected from weather and non target species).</li> </ul>
<b>Properties</b>	<ul style="list-style-type: none"> <li>- European Biocidal Products Regulation (BPR) number = UK-2012-0304.</li> <li>- Fortec™ technology has also shown during field trials, to have a significantly reduced neophobic (fear of new objects) reaction, (over 20% reduction). When compared to a standard bait.</li> <li>- Made with loose cut wheat grain.</li> <li>- Comes as a ready to use bait.</li> </ul>
<b>Consists of</b>	<ul style="list-style-type: none"> <li>- Active ingredient = Difenacoum, (content (W / W): 0.005%).</li> <li>- Neosorexa Gold bait.</li> <li>- Re-sealable container.</li> </ul>
