

01158 SIP 10000w Induction Heater

Part No: 01158

Price: £6299.99 (exc VAT) Save £5026.01

(RRP £11326.00) | £7559.99 (inc VAT)

Specifications

01158 SIP 10000w Induction Heater

The SIP 10000w Induction Heater is perfect for pre-heated welded fabrications, heat treatment and various manufacturing processes.

This induction heater is designed for use in heavy-duty industrial applications.

Features

A liquid cooling system allows the induction torch to safely reach temperatures of 1000°C within 15 seconds.

This prevents the cable and torch from overheating, which maximises performance and protects the user's hands from the heat produced.

This plug-and-play solution uses an all-electric process which offers greater levels of safety compared to oxyacetylene and other methods which use a naked flame.

Applications & uses: Ideal for heavy-duty industrial applications. Perfect for pre-heated welded fabrications and heat treatment.

Suitable for use in manufacturing processes such as metal stress releasing welding distortion and component assembly.

Powerful and compact (10,000w)

Features a 4mtr induction cable torch with 'one touch' trigger and contact heating pad.

Mobile unit delivers fast, safe and efficient heat quickly via the 10kW inverter power module.

Liquid-cooled induction cable and torch

A 10ltr coolant tank maintains integrity of the induction coils and keeps torch handle cool for long product life.

A flow switch protects the unit by ensuring the correct coolant fluid level is maintained.

Integrated fan-cooled radiator

Water returned from the induction torch enters a six-fan-cooled radiator system.

This is connected via a pipe system to the 10ltr coolant tank.

Sturdy and robust

Solid-frame mobile unit with hard-wearing tyres and lockable swivel castors.

Large internal case for heat-cooling and induction performance.

Easy-to-use

Touchpad buttons adjust and 8-setting multi-level induction power display indicator.

Indicator LEDs show mains supply present, cooling enabled and heating status.

SIP 2-Year Standard Silver Warranty

Specifications

Input Supply: 400v 3-PHASE

Induction Power: 10kW

Power Control: Multi-Level

Induction Cable Length: 4mtr

Power Cable Length: 5mtr

Inverter Ventilation: 6x Cooling Fans

Liquid Cooling System: Torch & Induction Cable

Optional Extras

HY02-00943 SIP 01157 Pad Coil Holder Extender

Part No:
HY02-00943
Price:
£66.99 (exc VAT)
£80.39 (inc VAT)

HY02-00944 SIP 01157 Pad Coil Inclined

Part No:
HY02-00944
Price:
£279.99 (exc VAT)
£335.99 (inc VAT)

HY02-00945 SIP01157 Pad Coil Flat

Part No:
HY02-00945
Price:
£279.99 (exc VAT)
£335.99 (inc VAT)

HY02-00958 SIP 01157 & 01158 Coolant Liquid 3 Litre

Part No:
HY02-00958
Price:
£32.99 (exc VAT)
£39.59 (inc VAT)

HY02-00980 SIP 01157 and 01158 Coolant Liquid 10 Litre

Part No:
HY02-00980
Price:
£99.99 (exc VAT)
£119.99 (inc VAT)
