Specifications

01161 SIP 1200W Handheld Induction Heater Kit

The SIP 1200w Handheld Induction Heater Kit is ideal for heating and releasing rusted-on or hard-to-move parts such as nuts, bolts and fastenings.

Designed for garages, automotive environments and workshops.

The kit is supplied with 4x interchangeable induction heating coils which perform a variety of heat treatment tasks with precision and ease.

Easy to control and highly efficient, this induction heater kit safely operates with a duty cycle of 2mins ON / 2mins OFF to maintain the cooling and integrity of the induction heating coils.

Using an all-electric process, this plug-and-play solution offers greater levels of safety compared to oxyacetylene and other heating methods which use a naked flame.

Key Features

Powerful 1200w handheld unit for precise and efficient use

Ideal for heating and releasing rusted-on nuts, bolts and fastenings

Includes 4x versatile copper-wound induction heater coils

Easy to use and simple to power from a 230v (13A) supply

Lightweight and portable design and supplied with storage case

Plug-and-play solution using an all-electric process
