Specifications

01459 SIP 8" x 2" Bench Grinder / Linisher

The SIP 8" x 2" Bench Grinder / Linisher is a dual process metalwork machine.

It is ideal for grinding, shaping and smoothing metal workpieces.

It's also suitable for sharpening workshop tools.

This highly versatile machine features a durable grinding wheel and linisher belt.

It has an adjustable LED work light for greater precision and visibility.

Suitable for ferrous metals including mild steel and tool steels, plus copper and brass.

Grinder / linisher machines are an essential item for any professional metalworking workshop.

Key Features:

Dual processing grinding and finishing machine

Adjustable LED work light

Quick replace wheel and belt changes

Grinding wheel with eye shield and spark arrestor

Linisher belt with work table deflector

Bench-mountable
