

0168 Granville CV Grease

Part No: 0168

Price: £7.95 (exc VAT) | £9.54 (inc VAT)

Specifications

0168 Granville CV Grease

Granville CV Grease (constant velocity joint grease) is a Lithium based No 2 grease with a Molybdenum Disulphide additive package.

Granville CV Grease is specifically designed for use in most modern constant velocity joints found on trucks, vans and cars.

The grease is very tenacious and will resist "pounding out", even under shock loading.

The solid additives adhere to metal surfaces where required under pressure, to provide a long-life lubricant film.

Granville CV Grease is highly water-resistant (including salt-water) and can be recommended for lubricant duties on equipment working in aqueous conditions.
