Specifications

SIP 03678 Adjustable Engine Support

SIP Adjustable Engine Support

Our Adjustable Engine Support features general adjustment through the feet and twin spindles, and further tuning via a manual screw rod. Ideal for working with engines and gearboxes.

0.5 Ton maximum weight capacity

Ideal for most cars and small vehicles

Ultra heavy-duty double-grooved chain

Easy to position gearboxes or engines

Fine adjustment by manual screw rod

Adjustable feet and twin spindles over
the whole length of the engine support
Soft rubber shoes prevent damage
Solid and durable construction
