Specifications

SIP Pro Startmaster PWT1000 starter charger

Suitable for use with 12/24 volt vehicle batteries and is the largest capacity unit from this model series that we stock.

Being more versatile in the number of charge settings and power output, makes this the ideal for the professional workshop situation where you may require a unit that can cover many vehicle requirements.

Performance output is 68 amps max charging current, with a 500 amp max boost rate, with 6 selectable charge rate settings with 370Ah battery capacity.

A top mounted Ammeter shows operational progress.

Also features Short Circuit / overload protections and reverse polarity protection.

The SIP Startmaster PWT1000 Starter Charger is ideal for workshops and garages, with 6 powerful charge settings, built-in reverse polarity protection, and heavy-duty Italian design.
