Specifications

05727 SIP Foot Pedal Control for 05795

The SIP Foot Pedal Control offers hands-free control of the welding output current.

It is designed for use with the SIP PRO 200A AC/DC TIG/ARC Welder with Pulse.

Ideal for professional users, the pedal action allows controlled movement between a minimum and maximum current range which can be set using the control dials.

This offers greater control of the weld pool and welding process, helping to maintain higher quality welds.

Key Features:

Ideal for professional users

Hands-free control of welding output current

Two control dials for output current setting

Pedal action allows for controlled movement between range

Greater control of the weld pool and welding process

Helps to maintain higher quality welds
