Specifications

08204 TIGREN TGN200TIG DC TIG Inverter Welder

The TIGREN TGN200TIG DC TIG Inverter Welder is a 2-in-1 inverter for powerful HF TIG and MMA/ARC welding.

It offers low current stability for welding thin material and lightweight and compact design for simple portability.

Simply add gas and it is fully ready-to-weld straight out the box.

Ideal for a range of home, trade, and professional applications.

Perfect for stainless steel and mild steel projects.

As part of the TIGREN Welders range, the TGN200TIG is affordable and reliable, imparting powerful performance via unique and user-friendly features.

Features:

2-in-1 machine offering HF TIG and MMA/ARC processes

Integrated IGBT inverter technology platform

Low current output for welding thin materials

Lightweight and compact design for portability

Fitted with a post-flow gas timer

Ideal for a range of home, trade, and professional jobs

Perfect for stainless steel and mild steel projects

Supplied with 4mtr WP17V TIG torch, 3mtr 200A Earth lead,

3mtr 200A electrode lead, 2x TIG ceramic shields,

1.6mm and 2.4mm collets, 1.6mm and 2.4mm collet bodies,

1.6mm and 2.4mm Tungsten electrodes, handheld shield, chipping hammer, and wire brush

Specifications:

Input Supply: 230v (16A)

Output Current: 10A - 180A (TIG)

10A - 160A (MMA)

Duty Cycle: 180A @ 15% (TIG)

160A @ 15% (MMA)

Electrode Diameter: Ø 1.6mm - 4mm

Welding Thickness: 1.5mm - 8mm
