

Hypertherm Powermax 30 XP Air

Part No: 088098

Price: £2387.00 (exc VAT) | £2864.40 (inc VAT)

Specifications

088098 Hypertherm powermax 30 air is a 110 or 230 volt input plasma cutter that cuts up to 16 mm mild steel .

Hypertherms latest handheld plasma part number 088008 powermax 30 air is a single phase plasma cutter that has its own integral compressor. Simply plug in to a single phase 110 or 230 volt supply and this machine will cut mild steel up to 16mm thick.

The new machine uses patented consumables that allow the plasma cutter to operate without need for high air pressures indeed the new consumables only need a 50 psi supply from the integral compressor. The compressor can therefore be a small lightweight machine that fits easily into the casing of the plasma cutter which makes it a very portable unit that only weighs 13.5kgs in total.

The machine is supplied with 4.5 metre air T30 hand torch, 4.5 metre earth lead, Operator and safety manuals, carrying strap, 1 nozzle and 1 electrode.
