Specifications

09299 SIP Fireball Turbofan 9001 Electric Fan Heater 3 Phase

The SIP FIREBALL Turbofan 9001 Electric Fan Heater is a powerful and portable heater.

Is designed to quickly and effectively heat medium-sized workshops and garage spaces.

Featuring a high-power heating coil to maintain immediate and consistent temperature levels, the Turbofan 9001 safely delivers powerful and continuous heating.

Key Features:

30,706BTU/hr (9kW) powerful heating output

High power coil to meet demanding heat requirements

Integrated thermostat for flexible temperature control

Heater doubles as a conventional cooling fan

All-in-one design offers outstanding portability

Powder-coated finish for added durability

Specifications:

Input Supply: 400v (16A) 3-PHASE

Max. Heat Output: 30,706BTU/hr (9kW)

Heat Settings: 3 settings; 30,706BTU/hr (9kW) / 15,355BTU/hr (4.5kW) / Fan (52w)

Tilt Adjustment: Yes

Product Dimensions:500(H) x 360(W) x 400mm(D)
