Specifications

25298 SIP Weldmate Pro SW150 Spot Welder with Timer

The SIP WELDMATE® PRO SW150 Spot Welder with Timer is a portable resistance welder.

It is designed for sheet metal applications in automotive environments and light fabrication workshops.

Ideal for vehicle body panel repairs and light sheet metal tasks.

This easy-to-use welder uses copper/chrome alloy electrodes to achieve a maximum welding thickness of 1.5mm - 1.5mm

It features a microprocessor-controlled timer function for precise and consistent welds.

For added flexibility the welder operates from a 13A supply.

It is also available with a range of additional electrode arms sold individually or as a bodywork kit for greater application versatility.

Key Features:

Maximum welding thickness of 1.5mm - 1.5mm

Timer function of 120~900ms for consistent welds

Fitted with heavy-duty weld switch for reliable operation

Operates from a 13A supply added for ease-of-use

Heavy-duty carry handle for work area movement

Supplied with replacement 16mm straight electrodes

Specifications:

Input Supply: 230v (13A)

Max. Welding Thickness: 1.5mm - 1.5mm

Spot Duration: 120-900ms

Welds Per Minute: 3 welds per minute

Max. Electrode Force: 460N

Product Dimensions: 244(H) x 94(W) x 475mm(D)
