Specifications

25405 SIP Medusa ISG8800 Digital Inverter Generator

The SIP MEDUSA® ISG8800 8.8kW Dual Voltage Digital Inverter Generator is a low noise petrol generator.

It is designed with powerful inverter technology that offers a clean and stable pure sine wave output.

Suitable for a range of electronics, devices and tools, including those susceptible to electrical wave distortion.

An enclosed design reduces operating noise - just 63dB(A) - compared to traditional open-frame generators.

It ensures powerful and dependable 110V/230V performance in noise-sensitive environments, including commercial, agricultural and construction use.

For outstanding mobility, it is wheel-mounted with retractable handle and anti-vibration feet.

Perfect for easy positioning and safe, efficient transportation.

Key Features:

Powerful 459cc 4-stroke petrol engine for dependable 5.8kW max. output

Dual voltage output via 1x 230V (16A), 1x 230V (32A) and 1x 110V (32A) sockets

Clean and stable pure sine wave (THD <3%) output ideal for sensitive electronics

Enclosed design reduces noise to just 63dB(A) for use in noise-sensitive spaces

Integrated economy control switch for low loads and increased fuel efficiency

Wheel-mounted with large retractable handle for outstanding portability
