

Stiga Gyro 500e Axial Mower

Part No: 2F7062505/ST1

Price: £5857.50 (exc VAT) | £7029.00 (inc VAT)

Specifications

Stiga Gyro 500e Axial Mower 98cm Cut Width for Lawn sizes up to 70 x 70 Metres (5000m²)

The STIGA Gyro is the first ever drive-by-wire joystick mower with STIGA Direct Drive technology.

Battery-powered, energy-efficient and safe. The STIGA drive-by-wire system is really intuitive and easy to manage.

The whole design and functioning of the STIGA Gyro axial mower is built on the patented STIGA Direct Drive technology.

STIGA Gyro 500e is the smallest model in the family, featuring a 98 cm cutting deck (mulching as optional) and a 40Ah battery pack.

Up to 80 minutes runtime and 5000 sqm working area (on one charge).

STIGA Direct Drive – STIGA patented technology improving driveability and reliability of the machine

Safe – Maximum control and optimum stability, even at high speed

STIGA ePower – Performance beyond industry standards

Made for wide areas – Covers up to 5,000 sqm on one charge

STIGA Smart driving & cutting mode to adjust machine depending on work to be done

Battery kit included

The Stiga Gyro 500e includes a 5 year warranty (Terms and conditions apply see below)

The unique joystick technology by STIGA gives you maximum control over direction, steering and speed.

A 360° turning radius makes cutting around trees, shrubbery, flower beds and garden ornaments effortless; like a zero-turn mower, but bettered.

Control both blade rotation and traction speed for a fully customisable cut, perfectly suited to the shape, size and condition of your lawn.

The STIGA Vehicle Management System communicates automatically with the machine's traction controllers, independently managing Direct Drive motors in each rear wheel to deliver an instant response, maximum safety and precise trajectory as you mow.

Move the deck to eight cutting positions using the lightweight central lever.

Then with STIGA's Smart Cutting Mode, choose from three blade speed settings: Eco (2.800 rpm) for very frequent mowing of soft grass.

Or if you choose to mulch the grass; Standard (3.000 rpm) for usual, weekly sessions and cuts up to 2.5 cm; and Boost (3.200 rpm) for quicker cuts or thick, taller grass.

The Stiga Gyro allows you to combine the cutting and driving speed to suit the kind of work to be done on your lawn.

You can choose between Standard for your usual cutting sessions; and Performance at 11 km/h for the fastest results.

For each of the speeds, Gyro will automatically limit minimum and maximum speeds and apply different acceleration curves - this way, you will always feel in control, regardless of whatever speed you choose.

Thanks to a very well-studied weight distribution and a very low centre of gravity (just 55.3 cm), Gyro gives optimum stability - both for pitch and roll - also on slopes up to 15°.

Following STIGA's tradition of testing beyond industry standards, Gyro is tested to ensure a greater safety margin (up to 32°) in comparison to the suggested use of the machine.

Plus, the electronics of the machine automatically manage speed limitations when on slopes, further enhancing its safety.

With its integrated ePower battery pack and 98cm-wide side-discharge cutting deck, the Gyro 500e can mow up to 5,000 square metres on one charge – with minimum noise and vibrations.

Use the included fast charger to fully recharge the battery pack in just two hours and 45 minutes.

Step in and out easily – the wide footboard gives plenty of legroom. Have complete visibility over

each working area. Enjoy the feeling of fitting in the machine, not just perching on it.

And drive comfortably thanks to the seat with high back support, and dual parallel suspension system absorbing vibrations across bumpy ground. Controls are all at reach and can be managed with just one of your finger tips.

Specifications:

For Lawn Size: Up to 70 x 70 Metres

Cutting width: 98cm

Cutting Heights: 25 - 105mm

Cutting Positions: 8

Run Time: 80 minutes

Charging Time: 165 minutes

This Garden Machinery product can be collected in-store or is only available for local delivery to the following local Postcodes HR, WR, SY & LD.

A range of optional related parts products for the Gyro 500e will be shown at the bottom of the page when available

We also provide full parts backup, servicing and workshop facilities by our own Mountfield & Stiga trained and accredited staff.

***Warranty Terms & Conditions.**

To maintain the 5 year warranty the mower must be serviced before the end of the first year of ownership and annually thereafter by an authorised Mountfield dealer.

Failure to keep the Mower serviced at these intervals will result in the warranty reverting to a standard warranty period.
