

7008 Aluminium MIG Welding Wire 0.8mm 2kg

Part No: 7008

Price: £28.95 (exc VAT) | £34.74 (inc VAT)

Specifications

7008 ER4043 Aluminium Welding Wire 0.8mm 2kg

Super 6 4043 Aluminium MIG Wire is an aluminium alloy containing 5% silicon, ideal for welding duraluminium, cast and wrought alloys.

This wire is suitable for general fabrication and construction, shipbuilding, automotive industry, and repair and maintenance.

Aluminium alloy containing 5% silicon, for welding duraluminium, cast and wrought alloys.

NB: Weld will discolour if anodised

General fabrication and construction, shipbuilding, automotive industry, repair and maintenance.

Specifications:

Mechanical Properties

Melting Point °C: 430

UTS N/mm2: 120

Hardness BHN: 45

Chemical Composition: Al 95.0 | Si 5.00

Welding Positions: PA, PB, PF, PC, PE, PD

Current Type: DC+

Shielding Gas: Pure Argon
