

7030270 Moisture Meter for Hay, Straw & Silage

Part No: 7030270

Price: £245.87 (exc VAT) | £295.04 (inc VAT)

Specifications

7030270 Moisture Meter for Hay, Straw & Silage

The Wile 27 is a moisture meter for hay bales, straw and drying silos

The Wile 27 ensures that your hay bales are dry enough for safe storage

It can also be used to determine the moisture content of silage fodder and silage

Application range:

Measurement of moisture in hay bales, drying silos and silage fodder: 10 to 70% moisture

Measurement of the moisture content of barley and wheat straw: 10 to 50% moisture

Features:

Simple operation, easy-to-read LCD display with 7 segments and large numbers

Wide range of applications

Length of measuring probe: 50 cm

Material of the measuring probe: stainless steel

Density: > 80 kg/m³

Measuring accuracy (+/-) 2 % Moisture range 10 - 70 %

Lance length 50 cm

Battery: 9V 6F22 Battery quantity supplied 1 x 9V 6LR61

Technical info:

The Wile 27 shows the moisture of the hay or silage fodder, i.e. the water content by weight.

The proportion of dry matter is equivalent to 100% minus the proportion of moisture.

i.e. for example, 30% moisture corresponds to 70% dry matter Hay and straw rot if the moisture content is too high; they can also heat up to a dangerous level in this process.
