

77065 Gunson memory saver module

Part No: 77065

Price: £21.95 (exc VAT) | £26.34 (inc VAT)

Specifications

77065 Gunson memory saver module

The Gunson EOBDF memory saver holds the data codes from the vehicle's ECU when the car battery is disconnected.

Simply plug it straight into the 16pin EOBDF socket and attach the battery clips (on 2m leads) to a slave battery.

Always ensure the polarity is not reversed.
