

MP786 HVLP Spray Gun 1.7mm Nozzle

Part No: 786

Price: £39.95 (exc VAT) | £47.94 (inc VAT)

Specifications

MP786 HVLP Spray Gun 1.7mm Nozzle

HVLP (High Volume Low Pressure) technology guarantees transfer rates significantly above the required 65% by VOC legislation and meets the requirements for the 1990 UK Environmental act.

These guns are not only more efficient, transferring 30% less paint in comparison to conventional guns but are also environmentally friendlier as they release lower levels of chemicals into the atmosphere.

A higher volume of air produces finer atomization giving increased control with less overspray.

Professional HVLP suction fed conventional spray gun with pressure sensitive trigger and air control screw

Fully adjustable spray pattern

Brass air caps (not aluminium) supplied for increased life

Stainless steel needle and nozzle

High quality anodised finish for easy cleaning

¼" BSP fitting

50psi / 3bar operating pressure

16 cfm air consumption

1000ml cup capacity
