Part No: BEDE2AK008346

Price: £70.68 (exc VAT) | £84.82 (inc VAT)

Specifications

BEDE2AK008346 Barn Paint Red 5 Litre

Product information:

Bedec Barn Paint is ideally suited to the protection of exterior buildings such as barns, stables, outbuildings, sheds, silos, windmills, and factory units (corrugated and metal box cladding).

It is highly recommended to coat, fencing, gates, farm equipment, tanks, drainpipes, doors, windows and many other areas around gardens, farms and factories.

Easy to apply. It can be applied to previously painted surfaces, even those coated with weathered bitumen, tar varnish and creosote.

Excellent colour retention. This acrylic system is a tough durable microporous protective coating with excellent colour retention.

It will flex with the substrate exhibiting reduced flaking and blistering.

Two or three coats can be applied quickly within one day, especially during the summer months.

The advantage over conventional systems is that the coats applied are all Barn Paint, therefore no stress is built up within the coating layers.

Long lasting finish

Colour availability: black, white, light grey, battleship grey, dark green, tile red, solid pine, country

cream, jacobean walnut, also black & white available in satin finish.
