

HWPOXYGEN Hobbyweld Oxygen Plus (20L)

Part No: HWPOXYGEN

Price: £77.08 (exc VAT) | £92.50 (inc VAT)

Specifications

HWPOXYGEN Hobbyweld Oxygen Plus (20L)

This gas is commonly and traditionally used with a fuel gas (acetylene, propane or propylene) for cutting, welding, brazing and soldering.

Oxygen supports the combustion of these gases and enables a much higher flame temperature to be achieved in comparison with air.

Our oxygen cylinders are filled from a bulk tank which ensures optimum purity,

a 1% reduction in purity can increase consumption of oxygen by 20% or more, so you can see the benefits of a professionally filled gas bottle

Optional Extras

Deposit Hobbyweld Plus

Part No: HWPD
