

Hobbyweld Acetylene 15.9L

Part No: HWUACET

Price: £200.83 (exc VAT) | £241.00 (inc VAT)

Specifications

HWUACET Hobbyweld Acetylene 15.9 Litre

Acetylene is the hottest and most efficient fuel gas on the market, making it the preferred product for many applications.

It is also the only fuel gas hot enough to weld steel, when using our oxygen and acetylene together, flame temperatures can reach an amazing 3500°C (6330°F)

You will typically use between 2 to 3 times the amount of oxygen as you would acetylene so don't let the smaller size of our cylinder put you off.

Using a number 5 welding nozzle with this gas canister will typically provide over 5 ½ hours of welding time.

Rent free gas cylinders; simply pay a one off deposit for your first cylinder and first gas fill, keep it for

as long as you need and then refill it as often or as little as you like.

Deposit is refundable on return of the bottle. (Must be returned with deposit form)

****Please note that Hobbyweld Gas products are for collection at our shop only****
