What sets Instagrid ONE apart is its revolutionary micro-inverter technology, breaking free from traditional bulky designs.

Each battery module operates independently, working seamlessly to deliver a pure AC sine wave for stable and efficient power.

Engineered and designed in Germany, this cutting-edge innovation ensures the ONE is more compact, lightweight, and powerful than standard battery systems.

Whether you're braving outdoor weather or powering indoor equipment, the IP44-rated weather-resistant design has you covered.

With a long runtime of 2.1kWh and lightning-fast charging in just 2.5 hours, you'll never miss a beat.

Plus, enjoy the luxury of zero emissions and completely silent operation, eliminating the hassle of noisy, fume-heavy generators.

And it doesn't stop there—Instagrid ONE is built for the future. With integrated GPS and a Smart App Controller, managing your power supply will be effortless.

And there's more. The optional Instagrid LINK modules allow you to take your setup to unparalleled heights.

Combine two or three compatible Instagrid ONE units with the LINK 230 for extended runtimes.

Or connect to a LINK MAX with three units to create a 400V, 3-phase portable power system, offering adaptability that's second to none.

Experience portable power like never before. The Instagrid ONE isn't just a device; it's your ticket to energy independence. Anywhere. Anytime.

Backed by a 4-year manufacturer's warranty, you'll enjoy peace of mind knowing this high-performance product is built to last.
