Specifications

PWH2 Blue Auto Darkening Welding Helmet

- Adjustable shade control - benefit from precise visual clarity and optimal protection as you weld, thanks to the seamlessly adjustable shade control ranging between 9-13.
- Shade control allows suitability for mig, tig, arc/mma welding and grinding. Also features sensitivity and delay controls for switching light to dark.
- True colour technology – technology allows for improved depth perception, allowing far greater welding precision.
- Fully automatic - fully automatic switching from light to dark on striking arc. Eyes remain firmly protected with an instant operating time between light and dark standing at 0.04ms.
- Shade is selected by a rotary knob on side of helmet.
- Solar panelled power supply - welding helmet is fully solar powered, without any need for any batteries or charging.

- Compliant with bs & din standards – helmet complies with bs en 379, bs en 175 and din standards.

Specifications:

Grinding Function: Yes

Operating Temperature: -5°C to +55°C

Operating Time Light/Dark: 0.04ms

Power: Solar Cells

Shade Active: 9-13 Variable

Shade Inactive: 4

Viewing Area: 92 x 42mm
