Specifications

PWH601 Auto Darkening Welding Helmet Shade 9-13

- Adjustable shade control - benefit from precise visual clarity and optimal protection as you weld, thanks to the seamlessly adjustable shade control ranging between 9-13.
- Shade control allows suitability for mig, tig, arc/mma and gas welding.
- Also features sensitivity and delay controls for switching light to dark.
- Adjustable sensitivity & delay - helmet has built-in sensitivity and delay switches to adjust to your needs.
- Fully automatic - fully automatic switching from light to dark on striking arc.
- Eyes remain firmly protected with an instant operating time between light & dark standing at

0.3ms.

- Shade is selected by a rotary knob on side of helmet.
- Solar panelled power supply – welding helmet has a solar panelled power supply to help it last longer.
- Rechargeable lithium batteries also supplied.
- Compliant with bs & din standards – helmet complies with BS EN 379, bs en 175 and din standards.
