**Part No:** VFM2002

**Price:** £149.95 (exc VAT) | £179.94 (inc VAT)

### Specifications

VFM2002 Power brake kit

\*This is a shop display item and may not be supplied in the original shipping outer packaging, or point of sale packaging and may have cosmetic imperfections such as scratches or dents\*

The Power Trailer Brake is a 3 in 1 braking system, and is simple and quick to install.

Hydraulically powered from the existing brake line.

It is designed as a failsafe spring loaded system and is connected to the brake arms by a steel cable.

The brake is controlled by a 12 volt valve which automatically applies the brake when the power supply is off.

The brake can then be released by reconnecting the power supply and hydraulically recharging the power brake by depressing the brake pedal.

VFM2002 provides a cost effective high quality solution to trailer braking.

?Failsafe spring loaded braking system ?

Works independently to the standard tractor brakes ?

Automatically applies brakes in the event of a runaway ?
