VFM3137 Hydraulic Top Link

Part No: VFM3137

Price: £1351.12 (exc VAT) | £1621.34 (inc VAT)

Specifications

VFM3137 Hydraulic Top Link

These damped hydraulic cylinders from Walterscheid are the first hydraulic top links with an integrated shock absorber, designed to increase the efficiency of agricultural machinery.

The accumulator piston which houses the damping valve, is made of aluminium with low-friction seals designed to withstand high temperatures across a range of -20°C to 80°C.

In addition, the damped hydraulic cylinder provides increased comfort and safety with improved road-holding properties as well as reduced shocks.

Fewer pressure peaks mean less wear, offering lasting contributions to better productivity and performance.

These new top links are compatible and interchangeable with existing standard top links and can be installed without additional components or the need for additional space.

Tractor end category 3

Implement end category 3

Tractor end type Knuckle

5-11-2025 1/2

Implement end type Quick release

Max operating length 847mm

Min operating length 662mm

Stroke 185mm

OEM: AL202051, AL212927, AL219002, AL220204, AL223929, AL223970, BL15090, BL15404, BL15591, AL220203, AL222896,

Optional Extras
