Specifications

VLB4333 Bright Zinc Galvanising Paint 400ml

Bright Zinc Galvanizing Spray

VLB4333 Bright Zinc Galvanizing Spray is a zinc/aluminium based coating designed for anti-corrosive and decorative applications on galvanized steel, steel, iron, aluminium, welds and most other metals.

Contains high purity of powdered Zinc Metal (99%) and Aluminium flake for excellent electrochemical protection.

- Provides a bright, decorative and long lasting anti-corrosive finish
- Dried coat contains ~60% metal content
- Excellent adhesion to cleaned, prepared metallic surfaces
- Excellent flexibility
- Quick drying, no secondary curing required
- Suitable for exterior applications
- Excellent resistance to salt spray and weathering

- Suitable for welding through
