## **VPG5273 Clutch bearing**

Part No: VPG5273

**Price:** £212.33 (exc VAT) | £254.80 (inc VAT)

## **Specifications**

VPG5273 Clutch bearing

Type One bearing on integral slave cylinder

Manufacture type Vapormatic

ID 45.5 mm

OD 128 mm

Height 106 mm

The CSC concentric clutch cylinder is a unit that combines both the release bearing & slave cylinder in one component.

The release bearing is kept in contact with the clutch unit at all times & self-adjusts within the carrier to maintain a central position on the clutch.

This minimises wear & is more efficient than other systems.

The fluids used in these designs are extremely important due to the different piston seal type (No.3 on the diagram).

24-11-2025 1/2

Depending on seal type & application, the correct fluid must be used to ensure effective operation of the seal.

Oil Type = DOT3, DOT4, DOT4+ & more...
