

VPG5274 - Clutch bearing

Part No: VPG5274

Price: £228.41 (exc VAT) | £274.09 (inc VAT)

Specifications

VPG5274 - Clutch bearing

Type One bearing on integral slave cylinder

ID: 45.5mm

OD 128mm

Height: 106mm

The CSC concentric clutch cylinder is a unit that combines both the release bearing & slave cylinder in one component.

The release bearing is kept in contact with the clutch unit at all times & self-adjusts within the carrier to maintain a central position on the clutch.

This minimises wear & is more efficient than other systems.

The fluids used in these designs are extremely important due to the different piston seal type (No.3 on the diagram).

Depending on seal type & application, the correct fluid must be used to ensure effective operation of

the seal.

Oil Type = DOT3, DOT4, DOT4+ & more...
