

VPN4028 Wheel Nut Indicator M29

Part No: VPN4028

Price: £3.47 (exc VAT) | £4.16 (inc VAT)

Specifications

VPN4028 Wheel Nut Indicator M29

Save broken wheel studs!

Slip on one of these indicator pointers over the tightened wheel nut.

After road use the indicator instantly shows a wheel nut that has become loose.

Can also be used where you have left handed thread studs and nuts fitted to axles to indicate thread direction, on a hub with mixed right handed threads.

In this situation, broken wheel studs can be avoided by ensuring wheel nuts are removed in the correct direction.
