Specifications

XMS24CABLE10 Faithfull 10m Cable Reel

This XMS robust Semi-Enclosed 10M Cable Reel 230V, built by Faithfull, has safety in mind when manufactured.

This XMS reel features a thermal overload protection system to prevent damage to the cable from overheating.

It also has 4 shuttered sockets with a maximum load of 13A (3,120W) when fully unwound, and 4A (1,000W) when wound.

This robust cable reel is suitable for providing electrical power for both trade and DIY users.

Its semi-enclosed case allows fast rewind and helps to prevent damage to the cable when in transit or storage.

A flat base keeps the reel upright for easy storage and safety-wise protects the sockets from contact

with wet or damp areas.

Manufactured in accordance with BS EN 61242.

ASTA approved.
