Part No: XMS24TRIPODL

Price: £49.99 (exc VAT) Save £16.67 (RRP £66.66) | £59.99 (inc VAT)

Specifications

XMS24TRIPODL Faithfull 45W Sitelight & Tripod 110v - Dual Power

The XMS 45W Tripod & Safety Sitelight, 110V, is designed by Faithfull for both commercial or domestic use, and features the latest SMD LED lighting technology.

It shines a light wherever you need it, another great XMS saving.

Combining a high light output with the added advantage of a low power consumption and cool running temperature.

The LED site light avoids the burn hazards commonly associated with halogen lighting.

Unlike conventional halogen tubes, SMD LEDs are maintenance free and more resilient to damage, yet another best seller to feast your eyes over.

Another point to note in its favour, this light benefits from dual power.

In the event of a mains failure, the back up battery will power the light, ensuring site safety at all times.

It can be powered by mains or via the built-in lithium battery which allows for 50 minutes of 900 lumen lighting.

The battery is automatically charged when the light is plugged into the mains.

The slim and lightweight die-cast aluminium lamp head is IP54 rated for water and dust ingress protection.

The impact resistant glass lens makes these site lights a durable solution.

Its also fully adjustable and mounted on a sturdy floor stand – so can either be used as a pod light or mounted directly on to the telescopic tripod.

Two twist grip locks enable the tripod height to be quickly adjusted between 1010mm and 2000mm.

Specifications:

Mains Voltage: 110V.

Battery Voltage: 3.7V.

Power (Mains/Battery): 45W 10W

Light Source: SMD

Lumens (Mains/Battery): 4500±10% / 900LM±10%.

Color Temperature: 6500K.

CRI: ≥80.

Beam Angle: 120°.

Battery Charging Time: 3-4 hours.

Working Time in Battery Mode: Max. 50 minutes.
