### Specifications

XMS24UTILITY Faithfull Hi-Vis Folding Utility Knife

**\*\*Sold individually - choice of 3 colours\*\***

The New and Exclusive XMS Hi-Vis Folding Utility Knife, made by Faithfull.

It is just what you need on the job this time of year, safety is built into these highly visible folding knives, and what better time to purchase, this XMS deal is great value.

The Faithfull folding utility knife is ideal for all users who need to carry in a pocket in order to perform their job.

Whether it be a tradesperson who is climbing up and down ladders, a service engineer or a store man undoing strapping bands and boxes, a knife in a pocket is potentially dangerous.

This knife locks the blade securely into the body when it is not being used. While the oval shape (when closed) prevents any sharp edges snagging or digging in to you when you are moving around.

The design also features a blade locking system to lock the knife securely when it is open and ready for use.

There is also a quick-change blade mechanism. Simply depress the release lever at the top of the blade holding section, and then slide the blade out and replace.

Available in: Hi-vis green, hi-vis yellow and hi-vis blue.

This knife uses standard pocket knife blades (1992 style) which are readily available.
