Part No: XMS25DB230

Price: £20.83 (exc VAT) | £25.00 (inc VAT)

Specifications

XMS25DB230 Coreplus 230mm Diamond Blade Twin Pack

These XMS Top Twelve General Purpose Cutting Blades made by CorePlus are designed to provide low-cost cutting in various building materials.

This twin pack includes two 230mm blades, each featuring premium-graded diamond segments and a tensioned high-grade steel core manufactured to EN 13236 quality standards.

These blades are suitable for cutting concrete, concrete lintels, reinforced concrete lintels, hard sandstone, concrete pipes, concrete paving slabs,

bricks, block paving slabs, concrete kerbs, clay pipes, hard slate, roofing tiles, quarry tiles, and more.

The 12mm segments ensure efficient cutting performance, while the high concentration of premium grade diamond in each segment guarantees superior cutting ability.

The high-grade steel core is precision-engineered and tensioned for stability and durability.

The advanced bond metallurgy also prevents glazing, ensuring a clean cut every time.

The CorePlus Top Twelve 230mm Twin Pack is the perfect choice for professionals and DIY enthusiasts alike.

It offers reliable performance and durability for all your cutting needs, a must Get Kitted Out quality option.
