

Blue Lithium Complex 12.5KG

Part No: Z074K10

Price: £84.95 (exc VAT) | £101.94 (inc VAT)

Specifications

Exol Z074K10 Blue Lithium Complex 12.5KG

A specially developed multi-purpose lubricating grease for all anti-friction and plain bearing applications.

This grease has exceptional stability performance over a wide, elevated temperature range and can allow longer periods between re-lubrication compared with standard greases.

Lithium Complex is recommended for use in highly loaded industrial and automotive applications such as wheel bearings, pump bearings etc.

It has been primarily designed as a wheel bearing and chassis grease.

Distances of up to 70,000 miles between re-lubrication are possible with Lithium Complex.

It may replace ordinary lithium greases in many arduous industrial applications.

It is suitable for use in high pressure greasing equipment.
